

## CONTENTS

<b>M. Abramowitz:</b> Asymptotic expansions of Coulomb wave functions . . . . .	75
<b>G. K. Batchelor and A. A. Townsend:</b> A comment on F. N. Frenkiel's note "On third order correlation and vorticity in isotropic turbulence" . . . . .	120
<b>A. E. Benfield:</b> The temperature in an accreting medium with heat generation . . . . .	436
<b>M. A. Biot:</b> Transonic drag of an accelerated body . . . . .	101
<b>E. Bodewig:</b> On types of convergence and on the behavior of approximations in neighborhood of a multiple root of an equation . . . . .	325
<b>B. Bogert</b> ( <i>see N. Levinson</i> )	
<b>O. Bottema:</b> A geometrical interpretation of the relaxation method . . . . .	422
<b>L. Brillouin:</b> The B.W.K. approximation and Hill's equation, II . . . . .	363
<b>G. F. Carrier</b> ( <i>see J. A. Lewis</i> )	
<b>G. F. Carrier:</b> A note on the vibrating string . . . . .	97
<b>G. F. Carrier:</b> A generalization of the Wiener-Hopf technique . . . . .	105
<b>G. F. Carrier and J. A. Lewis:</b> On heat transfer problems in viscous flow . . . . .	450
<b>Pei-Ping Chen:</b> The equivalent loading method and the equivalent beam method . . . . .	183
<b>G. J. Clemens:</b> A tapered line termination at microwaves . . . . .	425
<b>N. Coburn:</b> Degenerate two-dimensional non-steady irrotational flows of a compressible gas . . . . .	439
<b>G. Colonnetti:</b> Elastic equilibrium in the presence of permanent set . . . . .	353
<b>D. C. Drucker:</b> Some implications of work hardening and ideal plasticity . . . . .	411
<b>F. Edelman:</b> On the compression of a short cylinder between rough end-blocks . . . . .	334
<b>A. E. Green:</b> On Reissner's theory of bending of elastic plates . . . . .	223
<b>H. J. Greenberg:</b> Complementary minimum principles for an elastic-plastic material . . . . .	85
<b>W. D. Hayes:</b> An alternate proof of the constancy of circulation . . . . .	235
<b>M. Herzberger:</b> The normal equations of the method of least squares and their solution . . . . .	217
<b>F. Herzog and C. P. Wells:</b> A problem concerning orthogonal trajectories . . . . .	121
<b>A. W. Jacobson:</b> Solution of steady state temperature problems with the aid of a generalized Fourier convolution . . . . .	293
<b>E. H. Kennard:</b> Generation of surface waves by a moving partition . . . . .	303
<b>R. King</b> ( <i>see C. H. Papas</i> )	
<b>G. Kreisel:</b> Surface waves . . . . .	21
<b>M. Z. Krzywoblocki:</b> A general approximation method in the theory of plates of small deflection . . . . .	236
<b>M. Z. Krzywoblocki:</b> On steady, laminar two-dimensional jets in compressible viscous gases far behind the slit . . . . .	313
<b>J. LaSalle:</b> Relaxation oscillations . . . . .	1
<b>N. Levinson, B. Bogert, and R. M. Redheffer:</b> Separation of Laplace's equation . . . . .	241
<b>J. A. Lewis and G. F. Carrier:</b> Some remarks on the flat plate boundary layer . . . . .	228

<b>J. A. Lewis</b> ( <i>see G. F. Carrier</i> )	
<b>C. C. Lin</b> : Note on the characteristics in unsteady one-dimensional flows with heat addition . . . . .	443
<b>J. B. Lohman</b> : An iterative method for finding the smallest eigenvalue of a matrix . . . . .	234
<b>M. Lotkin</b> : Supersonic flow over bodies of revolution . . . . .	65
<b>L. A. MacColl</b> : A theorem concerning the positions of equilibrium of a rigid body . . . . .	472
<b>D. Middleton</b> : The spectrum of frequency-modulated waves after reception in random noise—I . . . . .	129
<b>J. W. Miles</b> : The diffraction of a plane wave through a grating . . . . .	45
<b>J. W. Miles</b> : A note on a solution to Possio's integral equation for an oscillating airfoil in subsonic flow . . . . .	213
<b>J. W. Miles</b> : A note on supersonic flow in the Trefftz plane . . . . .	470
<b>F. J. Murray</b> : Linear equation solvers . . . . .	263
<b>R. Gran Olsson</b> : Rigorous solution of a differential equation in soil mechanics . . . . .	338
<b>R. Gran Olsson</b> : Remarks on the motion of anchor chains . . . . .	463
<b>C. H. Papas and R. King</b> : Currents on the surface of an infinite cylinder excited by an axial slot . . . . .	175
<b>Aris Phillips</b> : Variational principles in the theory of finite plastic deformations . . . . .	110
<b>R. Plunkett</b> : On the convergence of matrix iteration processes . . . . .	419
<b>H. Polachek</b> : Solution of the differential equations of motion of a projectile in a medium of quasi-Newtonian resistance . . . . .	275
<b>H. Pollard</b> : Note on the kernel $\exp(- x-y )$ . . . . .	473
<b>R. C. Prim</b> : A new superposition principle for steady gas flows . . . . .	445
<b>A. E. Puckett and H. J. Stewart</b> : The thickness of a shock wave in air . . . . .	457
<b>R. M. Redheffer</b> ( <i>see N. Levinson</i> )	
<b>E. Reissner</b> : Note on the problem of twisting a circular ring sector . . . . .	342
<b>H. J. Stewart</b> ( <i>see A. E. Puckett</i> )	
<b>K. Tamada</b> ( <i>see S. Tomotika</i> )	
<b>H. P. Thielman</b> : Corrections to the paper "On a class of singular integral equations occurring in Physics" . . . . .	347
<b>S. Tomotika and K. Tamada</b> : Studies on two-dimensional transonic flows of compressible fluids.—Part I . . . . .	381
<b>A. A. Townsend</b> ( <i>see G. K. Batchelor</i> )	
<b>D. Trifan</b> : A new theory of plastic flow . . . . .	201
<b>A. Van Tuyt</b> : On the axially symmetric flow around a new family of half-bodies . . . . .	399
<b>C. P. Wells</b> ( <i>see F. Herzog</i> )	
<b>A. M. Winslow</b> : A simplified method of differentiating and evaluating functions represented by Fourier series . . . . .	423
<b>A. Wintner</b> : A criterion of oscillatory stability . . . . .	115
<b>W. H. Wise</b> : Capacity of a pair of insulated wires . . . . .	432
<b>J. Wolfowitz</b> : The distribution of plane angles of contact . . . . .	117
<b>Book Reviews</b> . . . . .	126, 236, 347, 474
